

Dannevirke Central Kindergarten's Philosophy

We believe in working with parents, caregivers and whanau as partners. We have an open door policy, which builds ongoing responsive and reciprocal relationships with families and the community.

Central Kindergarten provides a fun, friendly, caring and safe environment that encourages children and their whanau to experiment, explore and build on their strength and interests.

At Central, the environment allows for indoor and outdoor learning through play and the children and whanau are encouraged to interact with the environment, people, places and things with respect and care. The children and their families have understanding of what is acceptable behaviour.

As teachers we believe in involving our families/whanau and children in on-going professional development to provide the best available early childhood experiences.
